

## ✓ Safe-Life Pendant

The Smart Caller 'Safe-Life Pendant' is a 'Go Anywhere' personal emergency alarm that helps provide, safety, independence and security.

Working off the 3G Cellular network, it works in the home, a business, at the shopping mall, in a field or even a forest.

Wherever there is 3G coverage, the Safe-Link Pendant can put you in contact with someone to help you, or locate you in an emergency.

### Emergency SOS NZ Wide

The Safe-Life Pendant is ideal for anyone at risk of falls or having medical issues, giving you and your family peace of mind that help is close.

### Location Finding

The Safe-Life Pendant is ideal for people working alone, high risk work, duress situations, working with machinery, having limited physical movement, spending any time at home alone or just wanting to know that help can be reached when you need it most.

### Fall Detection

The Safe-Life Pendant is a waterproof 'Go Anywhere' pendant, worn with a lanyard, just like a necklace. Any time help is needed, just push the button on the pendant once and the Safe-Life Pendant puts you in contact with someone that can assist you.

With Smart Caller Safe Life Pendants you can feel secure in your own home, at a business, in a shopping mall, working at heights or even in a farmers field. They are simple, easily accessible devices that can make a world of difference in an emergency.

These devices allow you to alert your personal contacts in the event of a fall or other emergency. Whether you are a senior looking for extra security, an employer wanting to improve health & safety, a family member concerned about an older or disabled adult living alone, or a chronically ill individual wishing to give your family some peace of mind, you can benefit from considering a Safe Life Pendant.

## Features

**No Monitoring Fees** - Works at home, business, shopping mall, in a field or beach - wherever you have 3G cellular coverage you will have a working alarm. If you need help simply press the SOS button and a personalised "Help" message will be sent to up to three programmed recipients. Included in this text will be the GPS co-ordinates of your location which can be viewed immediately via Google maps. On receiving this Help message the recipient can dial in for quality two way speaker phone voice contact without the wearer having to answer the call. Waterproof and bedside charger/docking station also included. Battery life 3 to 4 days with low battery reporting.

**Spark & Vodafone 3G Network** - Make sure to order the version to suit the carrier that gives you the best coverage for your location, either Spark or Vodafone.

**Falls Detection** - Includes Falls Detection with 10 second delay to cancel for false alarms.

**Location Finding & Geo Fencing** - If you're caring for a person that may wander, or wanting to locate an employee or contractor simply text "Loc" (for locate) anytime and the Safe-Life Pendant will respond by returning an SMS with the user's location. This SMS will contain the Google Maps link, simply tapping the link will display the location of the pendant on Google Maps.

**Receiving & Making a Normal Phone Call** - Call into the Safe-Life Pendant anytime and the incoming call can be answered by the user pressing the SOS button momentarily. Press and hold the discreet side call button to make a normal phone call to the first emergency contact.

**Geo Fence** - You can set three GEO Fences so if a person enters or leaves an area, the persons monitoring the units will be notified by SMS of GEO Fence being broken. Great for keeping contractors out of restricted areas, or knowing if someone wanders out a house door they are not supposed to.

**Other Features Include** - Professional Monitoring Option, Movement Alarm and Over Speed Alarm. Password Protection.

**Easy To Programme** - Simply programme the Safe-Link Pendant by texting commands from any mobile phone. Easy to follow instructions.

**Sim Card** - Requires an activated SIM card and network coverage (not supplied). Can be programmed for sending SMS only or SMS followed by dialling out to the recipient. The waterproof Safe-Link Pendant as an internal SIM card and a small Phillips head screw driver is required to open and insert the SIM. Screw driver not supplied.

**Four Different Colours** - The Safe-Link Pendant is available in 4 colours. Black, Blue, Pink and Green. Black is the default colour and this will be supplied unless a different colour is selected. Sometimes not all colours are available

## New Zealand's Best 'Go Anywhere' Emergency Alarm Pendants & Communications

The Safe-Life Pendant is a simple, easy to use and accessible device that can make a world of difference in an emergency. These devices allow you to contact help in the event of a fall or other emergency. Whether you are a senior looking for extra security, a family member concerned about an older or disabled adult living alone, or a chronically ill individual wishing to give your family some peace of mind, you can benefit from considering a personal emergency response system.

The technology that supports this is an economical & extremely flexible system for leading edge emergency communications in any location - across a room, a building, a site, a city or a country.

Irrespective of the application being a farmer working in the field, a lone worker in a warehouse, a contractor on site you want to keep track of, or an aged resident having absconded from safe perimeter containment or perhaps a staff member visiting domestic residents at night, this low cost, palm sized personal tracking device will identify the location of that person within approximately 15m. This is achieved by use of a combination of GPS and GSM technologies. The Safe life pendant has excellent GPS locating.

The tracker is effectively a mobile phone with inbuilt GPS satellite navigation positioning capabilities.

The Safe-Life Pendant operates by SIM card.

The SIM card with its identifiable phone number will send an SMS to up to 3 emergency contacts in the event that the SOS button is pressed. The emergency contacts will receive the SMS "SOS HELP". The message can be programmed to display the name of the person.

Within this message Smart phone recipients will also receive an internet hyperlink which once opened can identify the location of the person requiring assistance within an approximate 15m. The first recipient to call into the pendant will receive voice to voice communication via the pendants excellent speaker and microphone.
